PolyWhirl

PRIVATE TXNS ON POLYGON

Abstract

WHAT *IS* POLYWHIRL?

PolyWhirl is a completely decentralised platform for private transactions on Polygon Chain.
WHAT DOES THAT MEAN?

It means Polywhirl can help you preserve your privacy incase your identity and accounts are linked and exposed.

You can transfer all your funds to a new account without exposing your link to your previous accounts.
Overview

HOW DOES IT WORK?

The user waits for a while before withdrawing to ensure anonymity

User withdraws their tokens from a different account using the secret key generated at deposit

User deposits their funds in fixed amounts to a smart contract's pool

Roadmap

Q2, 2022
- Full Decentralisation of the protocol & Admin keys burn

Q1, 2022
- Cross chain private transactions
- Trusted Setup Ceremony

Q4, 2021
- DAO Launch
- Full functionality on mainnet

Q2, 2021
- Private Sale
- Token IDO
- Project Marketing & Development

Q3, 2021
- Mainnet Beta Launch
- Staking Pool Launch
- Anonymity Pool Incentives
- Additional token pools initiation

Token Fundamentals

POOL FEE REWARDS & BUY-BACK BURNING

80% of all pool fee will be given back to all the stakers of $WHIRL. 20% of the pool fee will be used to buyback and burn the $WHIRL tokens.

LIQUIDITY INCENTIVE

The early liquidity providers will accumulate $WHIRL to incentivise them to bootstrap liquidity in the pool for increased anonymity. Longer you lock the liquidity, more the rewards you will earn.

UPCOMING DAO

$WHIRL will soon be used to govern the project using a DAO, with the tokens acting as the voting rights. The voting rights will be proportionate to the number of tokens a user holds

Tokenomics

Private Sale (Individuals)
10%

Private Sale (VCs)
10%

QuickSwap Liquidity
